Customer Reviews

This book is cute, pretty much just entirely silly 'meme' style quotes and blurbs for the show. It doesn't provide that much beyond a few minutes of amusement, doesn't have anything a fan wouldn't already know. It's also very much meant for very young kids, rather than adults/teens (which I suspect most people reviewing it right now are). While I don't care too much for it, my little sister was very excited and thinks its cute. A little kid will probably love it, especially if they're not big readers since its not as wordy as the Guide to the Crystal Gems, but they won't get too much out of

it (compared to the two activity books, Quest for Gem Magic and Live From Beach City!, that are already out)The main problem, I think, is that the product was described very poorly. Its described as a trivia book, which it isn't really and the book itself isn't at all written with the idea you'd be looking up trivia or facts in it. The description is also baffling because the book doesn't answer any of the questions it poses, and its a problem since I'd wager a number of people bought the book because it promised to explain where Lion came from when that's never addressed in the book at all (the book never even explains "how many Cookie Cats Steven can eat", so the description isn't at all reflective of the book itself). It's just a silly book that should've been described as a 'humor' book or something like that. Being described as a fact and trivia book, that will give the answers to questions fans have, is extremely misleading and as a result people feel tricked, since this was not the product that the description said it was. It would probably be a good idea to amend the description to prevent further problems.
