Make Your Own Robot

Synopsis

Have you ever dreamt of acquiring the most amazing collection of robots? What about being able to take them apart and rebuild them to bring the machines of your imagination to life? Well, here's your chance. This box-set includes fifteen different robot templates designed by Roger Fawcett-Tang, twelve of which have been illustrated and customized by a different trend-setting artist. Though varying in shape, the parts are interchangeable. Three blank DIY sheets also allow you to customize the templates with your very own designs. For robot obsessives of all ages, this playful but also intensely desirable object should become a collector's item in no time. Make sure you buy more than one set, and put at least one aside for the future. They may not change the course of technology or space travel, but they will certainly form a colorful and animated line-up on your shelf.

Grade Level: Preschool and up

Customer Reviews

I have just ordered 7 more books to keep on hand for gifts as I've already given away 8. Discovered this book when I bought it for my son. He was 3 or 4 when he got it. He's turning 6 now. He brought it in for "show N share" at school and the teacher wanted my ordering info. Mothers have made it a point to let me know that the book was the coolest gift they have received or even seen in a very long time. My 8 year old son loves it too!

I got this for my 4 1/2 year old before I saw it is for ages 8 and up. She had no trouble putting the

robots together and spent a lot of time playing with them as well. I would say if parents don't mind the kids being a little rough with the robots this is a great project even for the younger set.

I started putting the robots together as soon as I got the book out of the box, and had assembled most of them with the package on the table. Ok, I'm a grown-up, but this was the most fun I've had in a long time, and the envelopes were fantastic. The only problem is I like the robots too much to send them to anyone.

These are made on heavy duty card board so they are not flimsy. I love that each robot came with its own envelop which made for easy gifting or using as party favors.
