# National Geographic Readers: Lizards

## **Synopsis**

From geckos to iguanas, kimodo dragons to chameleons, lizards are about the most awesome animal around! They inhabit every continent except Antarctica. Some are lethal. Some change color. Some have suction cups on their feet. There is enough fascinating information about these animals to fill an entire library of readers! But we've taken the absolute coolest information about the coolest animal and compacted it in this fascinating level 2 reader, perfect for anyone who loves slippery, slimy, creepy, and crawly. This high-interest, educationally vetted series of beginning readers features the magnificent images of National Geographic, accompanied by texts written by experienced, skilled children's book authors. The inside back cover of the paperback edition is an interactive feature based upon the book. Level 1 books reinforce the content of the book with a kinesthetic learning activity. In Level 2 books readers complete a Cloze letter, or fun fill-in, with vocabulary words. National Geographic supports K-12 educators with ELA Common Core Resources. Age Range: 5 - 8 years

Grade Level: Kindergarten - 3

## **Customer Reviews**

The National Geographic Readers are perfect for Early Readers. My son loves animals and facts about animals more than fairytales and fiction books. These books are perfect for boys who want to know more about creatures and insects. I've ordered 5 or 6 and each NG Reader was well done

and accurate. The 4 for 3 promotion makes them a good bit cheaper than buying retail, also. He likes lizards so this was perfect for him.

A terrific book for reluctant readers. I would recommend it for boys age 8-11, especially if they don't like reading. The topic is high interest. The pictures are National Geographic quality. My young male students chose these National Geographic Kids books about reptiles first for independent reading time.

My seven year old son have all the series. Great collection to have. Very good value. He reads it every morning at breakfast and the facts are simple for him to retain and share with his older siblings. It encourages him to read more. He is homeschooled so it's great for reading and comprehension practice.

my lizard loving girls love this book. It has a lot of nice lizard pictures in it and they enjoy looking through it. I like the National Geographic series for kids....always a hit no matter what topic. We have several in this series.

My boys have so much fun with this book, they don't realize they're learning. It's more of magazine style inside instead of long blocks of writing that squirmy boys would rather not sit through. Beautiful pictures and fun facts. Caused us to go find some videos of the different lizards to see them live.

National Geographic books are perfect for teaching little ones about the world. I have purchased all of them for my grand-daughter, and they never disappoint, highly recommended for children of all ages.

We like all of the National Geographic books, we are a family of animal lovers so learning about the different species is always fun. The quality of photos is as you would expect from National Geographic.

We have so many of these books! We used these along with frog cake pops I made for favors for my sons 5th Birthday party. He had a reptile themed party and everyone LOVED it. Rather than a bunch of crap in a bag. Kids and Moms were excited to receive these!!
