Customer Reviews

My 12 year old 7th grader and I trully love this series of books, we are working with a couple right now and I intend to continue using this as a standard in our homeschool curriculum. Not only are the stories informative and fun, they have a perfect basis for reading comprehension. Highly recommended!

Be warned there is much "homework" assigned to get the whole lessons. In that I mean that there are a lot of technology research lessons imbedded. I love this, but some teachers may find it a needless distraction.

Good basis to begin our study program. Delivered in excellent condition.

More exercises that I expected, but that's great and very engaging.

I was pleased with the product.

great book!

Great

Horrible book...teaching our children the wrong information
