The Story Of The World: History For The Classical Child: The Modern Age: Tests And Answer Key (Vol. 4) (Story Of The World)

Synopsis

History has been taught in a boring way for far too long. A subject as moving and powerful as humanity's past should be inviting, and when it is told well, it is. Susan Wise Bauer succeeds in telling the captivating story of history with her best-selling history series. Parents and young readers have fallen in love with her narrative history, *The Story of the World*, and its accompanying Activity Book. Now teachers and home educators can take advantage of a new and valuable learning tool: the Tests and Answer Key package. Included are 42 tests: one for each chapter of *The Story of the World*. Perfect for evaluating comprehension and retention. The narrative format of *The Story of the World* helps children remember the famous people, places, and events in history. These tests offer you an easy way to make sure that your child is absorbing the important events from world history. A combination of multiple choice, matching, fill-in-the-blank, and short writing samples allow you to evaluate your child's retention and comprehension of key events in *The Story of the World*. The Tests package contains an answer key for all tests. These easy-to-use tests and answer keys, successfully used by hundreds of parents and teachers, provide an objective method for measuring retention of key facts, figures, and events from history. A combination of sequencing, matching, short-answer, and essay-style questions gives students a chance to show what they've learned. Used with *The Story of the World* Text Book and Activity Book (sold separately), the Test and Answer Key gives educators a complete history curriculum for their elementary school students.

Age Range: 6 and up

Grade Level: 1 and up

Customer Reviews

My family has greatly enjoyed the first three volumes of "The Story of the World" series. Our daughters have listened to the "Story of the World" CDs again and again. My oldest daughter on her own will pick up the first three books to read. So when Peace Hill Press sent out an email saying a few advanced copies were available, I quickly ordered a copy. When it arrived I had to take turns with my oldest daughter as we both wanted to read it. In many ways this is a good conclusion to the series. It is a bigger book than the previous ones. Susan Wise Bauer says in the forward that Story of the World Volume 1 was written for children in grades 1 to 4, volume 2 was written for children in grades 2 to 5, volume 3 was written for children in grades 3 to 6, and volume 4 was targeted at children in grades 4 to 8. So this last book is written for a much higher level than the first book. Be warned, in many ways this is a sad book, it focuses mainly on the wars, revolutions, and civil strife over the last 150 years. This is probably its biggest weakness. The book makes little mention of positive things that have happened over the last 150 years. Most of the discussions of changes in technology, business, or other areas of life have to do with how the changes affected war. It was sad to see some basic patterns. Again and again some leader, or group of leaders, would try to gain power or expand power, there would be a lot of fighting, many people would die, and often things wouldn't fundamentally change. The book is very comprehensive. It covers every part of the world. I learned a lot about South America and Africa. I had not realized that it was only in the 1870s that Europe carved up Africa. This is a good conclusion to the series. It is well written. It was hard to put down. If you have read the first three volumes then you should buy this book. If not, you might want to start with the first volume.

To be honest we are only ten chapters in to this volume (having read the previous three volumes), but this volume seems very choppy and disconnected. She does put a disclaimer at the beginning of the book stating the older age (fourth grade to eighth grade) of her intended audience, however the "storytelling" style of the previous volumes seems to be missing; that, in addition to the seemingly unrelated topics in each chapter make this book a much more difficult read, and certainly a more difficult "follow." We are hoping that the Activity Guide will make it more cohesive, however, it has not yet been released, which is very frustrating. Not giving up yet, however, as this has been a very good series overall.

I would say all ages, but I think it is several pages too long for a reader much younger than ten unless they are a gifted reader. A parent or caregiver could easily read it aloud for younger children. I really appreciate the author's vision in recognizing the need for unbiased, classic books that simply try to tell history rather than interpret it. In today's global environment, it is important for people to know a little of the history from around the world, and this author makes it more enjoyable than most of our carbon-copy textbooks that we all had in school. She tells history as a story, which is perfect because that is exactly what history is-the story of how people have lived and what they have accomplished.

Great to use in a middle school or high school classroom. My 7th graders enjoyed hearing the stories, especially the one about the Russian Revolution. If you teach World History this book should be in your classroom.

If you are teaching more than one age group I couldn't recommend a better history curriculum. I have 5 kids from 6yrs to 16. We all use the same book for history. I read aloud to the kids who can't read yet or who would rather listen. If you want to use this you will also need to buy the Activity Book. It includes lots of things to do for each subject including a list of books to read for older kids. I really like the recipes for each time period.

My husband is a history professor and he read these books to our oldest daughter. He thinks these books are a great introduction for kids to world history. He loves them and is now reading them to our little one.

We use this "History for the Classical Child" series along with our homeschooling as our end of the day reward. We love the storylines within, the mythology, and we really love the inclusion of Biblical history. Very enjoyable reading, with wonderful educational elements. I highly recommend this series. It is history presented in a very wonderful way.

We are a homeschooling family. I Love this whole series! I have all of them on CD which is great because we take them in the van with us. You can listen to them over and over and really remember it that way. They are Told kind of like a story so it holds your interest. I have 5 kiddos and I find they all enjoy and learn from these. I am learning alot too :)
