Let's Color! (Kumon First Step Workbooks)

Synopsis

Coloring exercises for young children are often too complicated. This book begins with a simple skill having a child scribble on a picture randomly. As children progress through the book, they slowly learn to color within designated lines. Using crayons is an important precursor to learning to write with a pencil. Ages 2 and up.

Customer Reviews

I recently discovered the Kumon books and I am super pleased with them. I will be reviewing all those I have so it will help other parents get a better idea of what's inside. The LET'S COLOR book is very nice and is part of the Kumon First Steps series for ages 2 and up. I must say that this book isn't for the very young only. My son is 8, and is a very normal child in every way, yet like some children, has not been very quick to develop fine motor skills for writing, holding a pencil, cutting, etc. He has enjoyed all his Kumon books very much, and they are not babyish. LET'S COLOR is a very nice book for children who would be overwhelmed by a whole uncolored page being placed in front of them to "finish". I like that most of each page in LET'S COLOR is colored already and is very colorful; only a white circle, square, triangle (nice for teaching shapes along the way) is left blank for the child to color in. My son is very pleased with just a small bit of coloring to finish the picture. He especially loves when his colored pencil (I recommend Prismacolors over crayons) matches almost exactly with the color of the object and when finished, you can't easily see where he did the

coloring. Later pages have you color 2 or 3 parts of the picture, such as blue, green, and yellow circles on the beach ball, or 3 different colored balloons, or the yolk of the egg. Then the last few pages are having the child color the 2 flowers, the mane of the lion, the icing and candles on a birthday cake, or different parts of a clown. Even these pages with more white areas to color, are not overwhelming to a child, as the full picture is only about 8 inches square.
