"Animalium" is a natural history museum in book form. "Curated" by Katie Scott and Jenny Broom, this exquisitely illustrated volume presents an overview of the diversity of earth's life forms. Presented as classes and arranged in evolutionary order showing the development through the ages, each chapter focuses on several of the species making up that class. Following the introduction or "Entrance", a two-page illustration shows the Tree of Animal Life. This section provides an overview of the content of "Animalium" and leads into the more specific "Galleries" (chapters) of the text. Each set of two facing pages within the Gallery consists of a

page containing a brief discussion and a key to the illustrations shown on the facing page, designated as a plate. The final set of facing pages in each Gallery holds a discussion of the habitat of the animals within the Gallery and an illustration incorporating those specific animals discussed on the preceding pages. The illustrations alone make *Animalium* a volume that anyone who appreciates artwork will want to add to their personal library. Softly colored pictures have the appearance of hand-drawn pen and ink illustrations that were common in naturalists' journals during the eighteenth and nineteenth centuries. Printed on heavy, ivory or aged ivory-colored pages – the page color was not consistent throughout the book – the entire volume seems to be a vintage book that one might discover in an attic or antique emporium. The inconsistency of page color may have been deliberate. Nevertheless, this does not detract from the overall appeal of the book. The text of *Animalium* is informative, but brief. Each section of the Galleries begins with a short paragraph about the subject of that Gallery.
