Our almost 6 year old boy will go through these really quickly (and he has 2 younger brothers who will like them sometime) so I cut the pages out of this book and slipped them inside Mead's sheet protectors for 3-ring binders. He completes the puzzles with overhead markers and then when he is done (or makes a mistake) we wipe it off with a wet cloth and it is like new again! He likes mazes, too, so I plan to do the same with the Usborne maze books.

My 3-1/2 year old daughter loves this book! The colorful dot pictures motivated her to use her pencils and markers to connect the dots all by herself. The dot-to-dot activities also helps her with her numbers. And, of course, she loves to find out what dinosaur is revealed once she finishes. I've been known to complete one or two of the pictures myself!

I purchased this dot to dot book to help my 5yr old expand on his recognition and learning of numbers. He enjoys dot to dot books.

I love that the numbers go higher than most connect-the-dots books. The paper in the workbook is very thick and each page gives a short sentence describing the different dinosaurs on the page. Plus, there's a pronunciation guide at the back of the book that is very helpful!

There are so many dot-to-dots in this book! My almost 6 yr old son absolutely loves it. He doesn't even realize that when he makes a dinosaur, he is practicing counting! Each page has a little info on the dinosaurs too. this book was better than i thought it would be and the price was great.

Yes, I would recommend this item. It arrived as advertised, on time, safely packaged, and I had no issues at all. I would def do business with this company again. Excellent product !! -Jim :-)

Originally I purchased this for my 4 year old grandson, but realized the numbers went higher than he has learned. So my 7 year old grandson loved being able to take over for the little brother. He loved the 2 page spreads of the scenes and the opportunity to color them in. It has been a nice quiet entertainment for him.

This book doesn't have a lot of pages, but my 8 year old grandson loved it. He is a dinosaur lover
