Customer Reviews

I think the company could've done a much better job picking clearer pictures/story themes to show the same concepts. There are many different recognizable story sequences that could be used from everyday life and they didn't use them here.

These were recommended by my son's preschool teacher. 90% of the scenarios/stories are great. Sequencing cards are a must and these are the best one's I've found for 2-4 year olds.

These cards are pretty decent. The images are good though they are not real pictures. Some of the scenarios are not that interesting but for most part worth the money

Was very helpful. We used it to help our child with autism

The product came as promised, new. It arrived in a prompt delivery with good packaging
